

Plaza access tunnels

Under Table Rock House, an elevator takes the rubber-clad visitor 35 meters down through solid rock where 200 meters of underground tunnels lead to three separate close-up views of the Falls. Only 10 meters above the river level, the observation plaza offers a distinctive vantage point from which to view or photograph the Falls and River. Behind the mighty curtain of water, two observation portals bring Niagara's cataract literally to the fingertips of the visitor.

Victoria Park Restaurant and Patio Garden

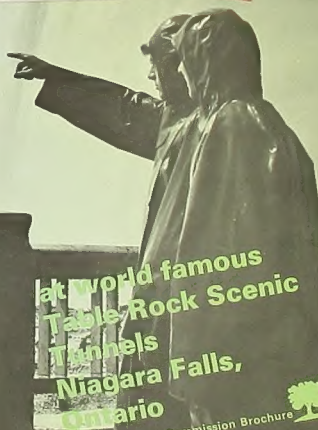

Formerly known as the Refectory, the Victoria Park Restaurant is a most complete dining complex. The fully-licensed second floor dining room has long enjoyed the reputation as one of the world's most delightful. Specialty of the house — fine foods with an unmatched view of the Falls. Or you can enjoy a light snack and refreshment on the balcony Bavarian-style patio garden. On the ground floor you'll find a modern cafeteria — and a quality gift shop.

Feel, Hear and Thrill to the power of Niagara

You'll never forget the thunder of the Canadian Horseshoe Falls . . . as you stand at the observation portals or on the observation plaza. You can feel its power, sense its grandeur as 155 million liters of water a minute cascade into the gorge only a few meters in front of you.

In addition to the Horseshoe Tunnel trip, Table Rock House offers a sweeping view of both Falls, gorge and upper river from the balcony on the building's top floor. Here you'll see the full sweep of the 675 meters wide Horseshoe Falls, the billowing mists and the churning waters of the gorge. This viewpoint offers an excellent opportunity to see the thrilling illumination of the Falls in the evening.

Niagara River waters drop 100 meters over the 56 kilometer course from Lake Erie to Lake Ontario. At the Falls, 155 million liters per minute roar over the 54 meters high Horseshoe Falls while 14 million liters drop over the American. Depth of gorge is 108 meters with water 54 meters deep. Niagara's electrical potential is 5,000,000 horsepower.

A focal point for Niagara's many millions of visitors, Table Rock House is almost as famous as the Falls themselves. It contains a large gift shop, and visitor information center. Adjacent to the south end of Table Rock House is a new building housing a fully-licensed specialty-menu restaurant, snack bar, gift and souvenir shop and public washrooms.
